# Margo Trident Scare Cannon

SKU:1450

## Description:

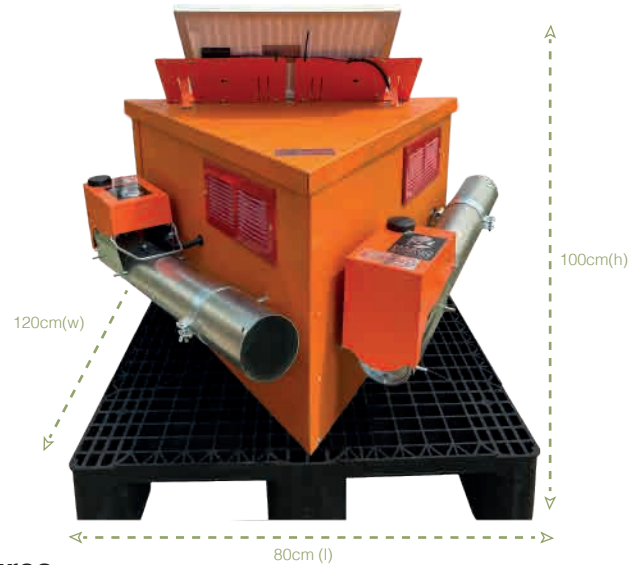

The Margo Trident uses 3 Margo Electra Scare Cannons for maximum effect. All cannons are mounted in a single stationary box that creates multiple blasts to scare birds away from areas where they can cause damage to property or are at risk themselves.

Protect high-value assets with maximum firing capabilities to deter even the most determined birds. The Trident offers a multi-directional cannon configuration making it ideal for military and aviation industry use.

## Quick Points:

- 360° degree firing coverage without any mechanical devices. Low maintenance.
- Fixed to a heavy duty pallet for easy repositioning. Heavy enough for the toughest conditions and wind storms.
- Includes solar panel, batteries, and propane adapter. 10,000 shots per tank. (Standard 20lb bottle)

## Features:

- 360° degree coverage
- No moving parts to break
- Single propane tank for easy maintenance
- 20W of solar charging
- Deep cycle battery for long life
- Separate compartments for propane and battery for high safety standards
- Independent cannons can be fired separately or together with appropriate control system
- Compatible with all Margo scare cannons

## Available in 3 Configurations:

### 1450a - Electra Timed Control

Advanced digital control. Each cannon fires on a set schedule, independently. Includes multiple firing schemes and quiet times.

### 1450b - High-Frequency Radio Control

Includes above digital control and 900MHz wireless control for on demand firing. Each cannon can be controlled together or separately.

### 1450c - Cellular Control

The highest level of digital control. Allows for remote firing anywhere with LTE and an internet connection. Includes advanced diagnostics, GPS, and instant feedback.
